To maintain optimum vehicle efficiency, reliability and safety, it is recommended that you follow the maintenance requirements as outlined in this book.

### General maintenance

General maintenance are those items requiring periodic inspection such as weekly checks that are important to your vehicle for proper operation.

These inspections can be either made by yourself or your Lexus Authorised Service Centre.

A full description of general maintenance items are given in the maintenance section of the Lexus Owner's Manual.

### Scheduled maintenance

Scheduled maintenance are those items requiring service at regular intervals. Scheduled maintenance is specified in section 4 of this book.

### Weekly checks

The vehicle identification plate is mounted at the bottom of the passenger's side 'B' pillar and also contains the VIN and other model data such as date of manufacture.

Date of manufacture, hereinafter called the "Built Date", means the calendar month and year in which the body shell and power train sub-assemblies are conjoined and the vehicle is driven or moved from the production line.

# LEXUS SCHEDULED MAINTENANCE

## LEXUS SCHEDULED MAINTENANCE

Lexus has developed a maintenance schedule incorporating two service programmes covering conditions you are likely to experience while driving your Lexus vehicle. To maintain your Lexus in optimum condition, it is recommended that you follow the service programme that best represents your driving conditions as outlined on the next page.

The time interval or odometer reading determines when service is necessary. For most people, the odometer will indicate when service is needed. If, however, you drive very little, your vehicle should be serviced at least every 12 months, as shown in the normal service. Under severe conditions, service is required more frequently as shown in the additional service.

### UNDERSTANDING THE MAINTENANCE SCHEDULE

Here is a guide to the codes defining what type of maintenance needs to be performed at each scheduled service. You'll find these marked on Maintenance Schedule pages.

- I = Inspect and correct or replace as necessary
- R = Replace
- T = Tighten
- L = Lubricate
- C = Clean

# LEXUS SCHEDULED MAINTENANCE

## Which service programme to follow?

Your Lexus needs to be serviced in accordance with the NORMAL SERVICE on pages 18 ~ 19.

If you normally operate your Lexus under any of the severe conditions listed below, some of the NORMAL SERVICE items need to be serviced more frequently as shown in the ADDITIONAL SERVICE schedule on page 20.

### ADDITIONAL SERVICE (SEVERE CONDITIONS)

#### OPERATING CONDITIONS

- Operating on rough, muddy or snow melted roads
- Operating on dusty roads
- Towing a trailer, camper or using a car top carrier
- Repeated short trips less than 8 km and outside temperature remains below freezing
- Continuous high speed driving (80% or more of maximum vehicle speed) for over 2 hours.

## LEXUS SERVICE SEALS FOR ADDITIONAL SERVICE

The Lexus Service Seals for Additional Service cover service items such as engine oil and engine oil filter changed every 6 months or 7500 km under severe operating conditions only.

## SERVICE LABEL

The service label is adhered to the windscreen on completion of each service performed. It serves as a reminder for when your next service is due and proves the authenticity of the last service performed by your Lexus Dealer.
